Education

Guru Tegh Bahadur Institute of Technology

Sep. 2018 – July 2022

Bachelor of Technology in Computer Science

Delhi

* Data Structures

* Algorithms

* Web Development

* Databases

Experience

Optiphoenix

Sept 2021 – Feb 2022

Software Engineer Intern

Delhi

- Technologies:- React.js, Html, CSS, Firebase.

Credable

Feb 2022 – Present

Associate Product Engineer

Noida

- Technologies:- Angular 8, React Native, Html, CSS.

Projects

Chat App | *React, node.js, express.js, socket.io, chakra ui* | [LINK](#)

- A react chat application in which you can send and receive messages, notifications in real time. This has been achieved using socket.io, for real time communication between users.
- Most of the ui of the app is built using Chakra UI. It is a library that gives you the building blocks for our React apps.
- Backend of the app is built using node.js, express.

Microsoft Excel clone | *Javascript, JQuery, node.js* | [LINK](#)

- Implemented clone of Microsoft Excel using jquery, node.js
- CSS and HTML for clone is custom and written from scratch.
- Includes most of the prominent features of excel along with file saving/downloading/uploading functionality.

Zira To-Do Web Application | *HTML, CSS, Javascript* | [LINK](#)

- Different tasks in the form of ticket can be added/removed.
- Priority of tasks can be set by assigning different colors to tickets (red, orange, yellow, green).
- Provides a unique id for every ticket. Tickets with certain priority color can be displayed by selecting a color from Priority bar
- Local storage is used to retrieve and load tickets.

Amazon-clone | *ReactJS, Redux, Firebase* | [LINK](#)

- A clone of amazon's shopping website, with basic functions and features
- User can login/signup through email/password, or can continue as a guest. Firebase has been used for user authentication.
- User can add items to be purchased in basket in variable quantities, add or remove from basket, and place order. Each user's data is stored in firebase's db

Uber-eats clone | *React Native* | [LINK](#)

- A clone of famous food delivery application (Uber eats) built using react native, redux.
- User friendly, helps user finding his/her restaurants by filtering them on basis of name, delivery type, rating.
- Used rapid api and yelp for obtaining info of random restaurants for dummy data.

Disney+ Hotstar Clone | *ReactJS* | [LINK](#)

- Created a full stack, Disney+ CLONE using React, Redux, and Styled Components..
- Handled authentication and images uploading/storing with Firebase database and Firebase Storage.
- Authentication can be done using standard email/pass and google account.

Technical Skills

Languages: Python (familiar), Java, HTML/CSS, JavaScript

Developer Tools: VS Code, Node.js, Firebase

Technologies/Frameworks: React, Angular, GitHub, Bootstrap, JQuery
